

1 **LELY COMMUNITY DEVELOPMENT DISTRICT**
2 **NAPLES, FLORIDA**
3 **Regular Meeting of the Board of Supervisors**
4 **June 17, 2026**

5 The regular meeting of the Lely Community Development District Board of Supervisors
6 was held on Wednesday, June 17, 2026, at 1:30 p.m. at the LCDD Maintenance
7 Building, Naples, Florida.

8 **SUPERVISORS PRESENT**

9 Anne Marie Bularzik, Chair

10 William Lee, Vice Chair

11 Kenneth Drum, Secretary

12 Andrew Fox, Supervisor

13 **ALSO PRESENT**

14 Neil Dorrill, Manager, Dorrill Management Group

15 Kevin Carter, Operations Manager

16 Tony Pires, District Counsel

17 Kevin Dowty, District Engineer

18 Freddie Bowers, Director of Community Patrol

19 **INVOCATION/PLEDGE OF ALLEGIANCE**

20 Mr. Dorrill offered an invocation, and the Pledge of Allegiance was recited in unison.

21 **PUBLIC COMMENT**

22 No public comment was received at this time.

23 **ROLL CALL/APPROVAL OF AGENDA**

24 The meeting was convened at 1:30 p.m. The meeting was also properly noticed. The
25 notice and affidavit are on file with the District Office at 5672 Strand Court, Naples, FL
26 34110. Four members of the Board were present, establishing a quorum.

1 Mr. Dorrill requested, as a professional courtesy, that Item 6A, Lely Freedom Horse
2 Monument Reimagining, be moved forward to immediately follow public comment so the
3 Outside Productions representatives could complete their presentation and return to
4 their office.

5 Dr. Bularzik added several items for discussion under Supervisors' Requests: the status
6 of the letter of appreciation for Mr. Terry Cole; the status of the letter of appreciation for
7 Mrs. Briant; whether a letter of appreciation should be sent to Mr. Phillips for his years
8 of audit service; an update on the two park benches; the two Supervisor positions up for
9 election; an update on Lely Island Estates posts and signs being sandblasted and
10 painted; discussion of purchasing an additional refrigerator for the LCDD building; and
11 purchasing additional bottled water for hurricane season.

12 Mr. Drum requested an update regarding the damaged front entrance sign. Mr. Pires
13 requested a brief pause in the agenda order between approximately 2:00 p.m. and 2:15
14 p.m. so Ms. Brakefield could participate by telephone in a litigation status update.

15 **The agenda was approved as amended on a MOTION by Mr. Fox, a second by Mr.**
16 **Drum, and all in favor.**

17 **LELY FREEDOM HORSE MONUMENT REIMAGING**

18 Mr. Dorrill introduced Mr. Pat Travis and Ms. Rebecca Morris of Outside Productions.
19 Mr. Travis stated Outside Productions has been in business since 2000 and had been
20 involved with the Lely Freedom Horses approximately 20 to 21 years earlier. He stated
21 the purpose of the presentation was to provide initial site analysis and conceptual work
22 for reimagining the entry feature around the horses and surrounding area.

23 Ms. Morris is a landscape architecture. The firm's work includes high-end residential
24 projects, community entrances, clubhouses, and commercial projects. She noted
25 current major projects include the Naples Beach Club, Port Royal Club, and Midtown at
26 Bonita Springs. She also recounted the history of the earlier Lely Freedom Horses
27 project and the decision not to place a fence around the Freedom Horses, which led to
28 the prior redesign of the entrance feature.

29 Ms. Morris stated the Lely entrance is a highly visible and important first impression for
30 the community. She explained that the team had completed a preliminary site analysis,
31 reviewed the existing condition of the entry, and identified primary viewing angles or
32 "money shots" from the main Lely entry, westbound and eastbound US 41, and the
33 exiting community traffic. She stated the design team also wanted to emphasize the

1 silhouette of the horses at the top of the grade and take advantage of the unusual grade
2 change available at the site.

3 Ms. Morris presented the first concept, called the "Great Falls." She explained that
4 concept would use a more compact footprint with significant verticality, including high
5 and low basins, approximately six-foot waterfall drops, substantial water movement,
6 bubblers in the lower basin, rock outcroppings, and a dry creek bed to visually extend
7 the feature. The design would preserve the horses in their current general location, work
8 around the existing core structure, and use the grade change to make the horses more
9 prominent against the skyline.

10 The presentation identified primary waterfall locations oriented toward the main US 41
11 and entry views, a terraced drop toward the secondary US 41 view, a dry creek bed
12 composed of rock material, and a screened mechanical or pump structure integrated
13 with the stonework. Ms. Morris stated the dry creek bed could potentially assist with
14 detention or retention needs depending on final grading. She also explained that the
15 pedestrian route from the parking area to designated photo locations would be designed
16 for ADA accessibility.

17 The Board discussed the proposed dry creek bed material, potential use of crushed
18 coquina shell, long-term weed and mildew concerns, storm surge elevation, the location
19 and screening of pump equipment, and whether water should directly contact the
20 bronze horses. Mr. Fox stated he preferred to avoid continuous water flowing directly on
21 the horses because of staining and lime buildup. Staff and the consultant also
22 discussed the possibility of fixtures near the horses that could simulate splashing water,
23 subject to maintenance and durability considerations.

24 Ms. Morris then presented the second concept, called the "Gentle Cascades." She
25 described it as a more tranquil, elongated water feature with larger pools, gradual
26 elevation changes, approximately 24-inch to 30-inch drops, natural rock outcroppings,
27 softer cascades, and a more peaceful progression of water. She compared the concept
28 to a "lazy river" and referenced the team's work at Winding Cypress as an example of a
29 more gradual water experience. The concept would still use the horses as the focal
30 point and preserve major views from US 41 and the community entrance.

31 Ms. Morris explained that the water would be treated and filtered similarly to a
32 swimming pool to reduce algae concerns. She stated the team would continue studying
33 the relationship between the horses and the water, including the possibility that some
34 horses could appear to move through the water while others remain on rock

1 outcroppings. She also stated the team would continue evaluating pathways, photo
2 locations, low-profile planting areas, turf, lighting, security, and methods of discouraging
3 climbing on the horses without compromising the open character of the feature.

4 Dr. Bularzik and Mr. Fox expressed a preference for a tranquil design. Mr. Drum
5 expressed interest in the dramatic visual impact of a waterfall. The Board discussed a
6 possible hybrid that would combine one or more meaningful waterfall drops with gentler
7 cascading water so the final design retained visual impact while remaining peaceful and
8 welcoming. The Board also discussed the potential need for additional security cameras
9 and maintaining the existing parking area because of right-of-way and permitting
10 constraints.

11 Mr. Travis and Ms. Morris stated they would continue developing the concepts based on
12 the Board's feedback. The Board thanked them for the presentation and the two distinct
13 design alternatives.

14 **PENDING LITIGATION UPDATE**

15 Mr. Pires provided an update regarding the pending litigation involving Stock, the Lely
16 Master Property Owners Association, Associated Realty, and the District. Ms. Brakefield
17 participated by telephone for this portion of the meeting.

18 Mr. Pires stated there had been meaningful progress during the prior week. He and Ms.
19 Brakefield participated in a conference call with counsel for the Lely Master Property
20 Owners Association to identify the fundamental issues with the Master Association's
21 revisions to the proposed settlement agreement. He characterized the discussion as
22 positive and stated it helped establish a process for moving forward.

23 Mr. Pires further reported that the attorneys for the parties participated in a separate
24 approximately 45-minute session with the mediator. He stated the attorneys had
25 previously requested more direct discussion rather than continuing to exchange large
26 sets of documents by email. The mediator encouraged the parties to communicate
27 directly, hold focused conferences, and continue working toward resolution before the
28 next formal mediation session.

29 Mr. Pires stated the District team would continue separate discussions with counsel for
30 the various parties before July 13, 2026. He stated the objective was to make sufficient
31 progress to potentially avoid the mediation session presently scheduled for August 13,
32 2026. Ms. Brakefield agreed that the parties now had a better path toward resolution
33 and stated the goal was to complete as much work as possible during the next month.

34 Mr. Pires explained that the exhibits to the proposed settlement agreement remain
35 critical because the agreement makes substantive representations concerning lakes,
36 permits, maps, ownership, operating entities, and future obligations. He stated Stock

1 initially prepared a spreadsheet, the Master Association revised it, and Mr. Dowty and
2 Mr. Carter had worked extensively to review South Florida Water Management District
3 files, correct entries, add annotations, and identify discrepancies. The revised material
4 was expected to be circulated to the other parties through a shared electronic file
5 system.

6 Mr. Drum asked whether the goal was a single settlement resolving the issues among
7 all parties. Mr. Pires stated the objective was a global resolution establishing the actions
8 each party must take so the District ultimately owns and operates the stormwater
9 management system in compliance with permit requirements, the litigation can be
10 dismissed, and the parties can exchange appropriate releases. He stated the
11 agreement also must include a mechanism for addressing any future breach of the
12 settlement terms.

13 Ms. Brakefield emphasized that the detailed work on the exhibits was necessary to
14 avoid returning to litigation later. She stated some of the underlying issues extend back
15 approximately 30 years and rushing to a settlement without correcting the exhibits could
16 recreate the same problems. Dr. Bularzik stated she wanted the litigation resolved and
17 agreed that the final resolution should be comprehensive.

18 The Board also discussed the parcel associated with the Lely Freedom Horses and
19 other property matters involving Associated. Mr. Pires stated the Freedom Horses tract
20 was among the parcels being reviewed, but the District had also discussed handling
21 that tract separately because it is not part of the stormwater management dispute.

22 **APPROVAL OF MINUTES MAY 2026**

23 **The May workshop minutes were approved as submitted on a MOTION by Mr.**
24 **Fox, a second by Mr. Drum, and all in favor.**

25 **The May regular meeting minutes were approved as submitted on a MOTION by**
26 **Mr. Lee, a second by Mr. Drum, and all in favor.**

27 **PATROL INCIDENT REPORT SUMMARY - MAY 2026**

28 Mr. Dorrill presented the Patrol Incident Report Summary for May 2026. He reported
29 124 incidents and stated the month included an unusual number of traffic accidents,
30 arrests, suspicious activity, and wildlife-related events. He also reported 102 traffic
31 stops resulting in 45 written warnings, 17 citations with fines, and 40 verbal warnings.
32 He noted some arrests occurred at the school and were not necessarily associated with
33 a traffic stop.

34 Mr. Bowers reported two vehicle accidents involving flower beds on consecutive days.
35 He also described an incident involving an individual who represented himself as
36 working for the Florida Fish and Wildlife Conservation Commission; staff challenged the

1 claim and addressed the matter. Another incident involved a vehicle being dumped near
2 the bark park even though security cameras were present.

3 The Board discussed the dumped vehicle. Mr. Bowers stated the vehicle was towed,
4 was missing an engine, and appeared to have been transported into the community on
5 a trailer. Video captured the individuals involved, including their return after one person
6 apparently left a cell phone in the abandoned vehicle.

7 Mr. Dorrill asked about a reported potential homelessness situation involving a food
8 truck. Mr. Bowers explained that an individual had placed belongings under a parked
9 food truck near the preserve area and appeared to be living under the vehicle.

10 **MANAGER'S REPORT**

11 **A. Lely Freedom Horse Monument Reimaging**

12 Discussed earlier in the meeting.

13 **B. Lakebank Restoration**

14 Mr. Dorrill presented the annual lake bank restoration contract with American Shoreline
15 Restoration. He stated the project is the largest lake bank restoration contract
16 completed by the District to date and includes approximately three-quarters of a mile of
17 lake bank work across three lakes.

18 Mr. Carter identified the project areas as Lake 17 behind the LCDD maintenance
19 building, Lake 5 near the US 41 entrance and the weir behind the Hobby Lobby area up
20 toward Pinnacle Cove, and a lake behind Palomino near Masters Preserve. He stated
21 the Lake 5 section is the largest portion and had been deferred because there were no
22 homes immediately along that bank.

23 Mr. Dorrill noted the current scope includes what the contractor described as a
24 sacrificial bag, with a second layer used to create a more uniform slope. Staff stated
25 American Shoreline Restoration is a known contractor with a strong history of work for
26 the District. Mr. Pires stated he would provide the District's standard contract addendum
27 addressing public records, E-Verify, prompt payment, and other governmental
28 requirements.

29 **On a MOTION by Mr. Fox, with a second by Mr. Drum, with all in favor, the**
30 **contract with American Shoreline Restoration for lake bank restoration in the**
31 **amount of \$295,600.00 was approved, subject to the addition of District Counsel's**
32 **standard addendum.**

C. Methodology Update

Mr. Dorrill reported that, at Mr. Fox's request, he contacted assessment methodology consultant Mr. Russ Weyer regarding the new apartment development and whether the District should reevaluate the assessment methodology applicable to the parcel. He stated the original methodology had not been reopened to his knowledge and that the parcel had historically generated approximately \$17,000 per year in District assessments based on approximately 26 equivalent residential units.

Mr. Dorrill stated Mr. Weyer is familiar with community development districts and the area and could evaluate whether the current assessment remains appropriate in light of the change from the prior development assumptions to a large residential apartment and coach-home project. The Board discussed the parcel's acreage, prior commercial or residential assumptions, future irrigation service, trip generation, impervious area, and other benefits provided by the District.

Mr. Pires explained that a revised methodology must be rationally based and defensible. He stated the analysis could consider different measures depending on the service or infrastructure, such as trip generation for transportation, impervious area for water management, and equivalent residential units for other services.

The Board discussed timing and agreed the development is not expected to open until approximately 2027. The consensus was to defer the formal methodology work for now and consider engaging Mr. Weyer during the next fiscal year, potentially beginning in January, after additional development information is available. The Board emphasized that any future assessment must be supportable and fairly allocated.

ATTORNEY'S REPORT

A. Lawsuit Update

Given earlier in the meeting.

B. Wildflower Way Property

Mr. Pires discussed the Wildflower Way property documents and communications from counsel for the Master Association. He stated the Master Association requested continued rights for parking, storage, maintenance work staging, debris collection, and storage of horticultural materials in areas associated with property proposed to be conveyed to the District.

1 The Board stated it was generally comfortable with the Master Association continuing to
2 park vehicles, trailers, and equipment used for Master Association work in the existing
3 area. Mr. Pires stated a permanent nonexclusive parking easement could be
4 considered. However, he expressed concern that the broader request was not
5 sufficiently defined and asked for clarification regarding the exact areas, types of
6 activities, materials, duration, and frequency of use.

7 The Board discussed information that material removed from stormwater pipes or catch
8 basins may have been deposited in the area. Mr. Pires and staff expressed concern that
9 sediment from roadways or lakes can contain metals or other contaminants and stated
10 the District should not knowingly acquire property subject to an ongoing disposal
11 practice without understanding the condition and use of the property. He said it is
12 possible to carve this area out in the agreement. Mr. Fox said the Master does not want
13 to own property at the end of this deal.

14 The Board also discussed whether horticultural debris, post-hurricane debris,
15 maintenance materials, or other waste could be stored on the property and the potential
16 for permitting, environmental, and code enforcement issues. The consensus was to
17 support continued parking and reasonable staging of Master Association equipment, but
18 to request detailed clarification before agreeing to debris collection, disposal, storage, or
19 other broader uses. Mr. Pires stated he would communicate that position to counsel for
20 the Master Association.

21 **FINANCIALS - APRIL 2026**

22 Mr. Dorrill presented the financials as of April 30, 2026. The District had approximately
23 \$5,853,000.00 in cash, including approximately \$1,488,000.00 in the operating account
24 and \$4,364,000.00 in reserves. The District also had approximately \$10,000,000.00 in
25 fixed assets net of depreciation, primarily representing the maintenance building,
26 irrigation utility, Lely Freedom Horses, drainage infrastructure, street lighting, and
27 related assets. Outstanding payables were approximately \$113,000.00.

28 Mr. Dorrill reported approximately \$90,000.00 in non-ad valorem assessments were
29 received during April. He stated those payments were delinquent and therefore included
30 additional charges that accrue to the District's benefit. Year-to-date non-ad valorem
31 assessments totaled approximately \$2,935,000.00, representing approximately 94.5%
32 of anticipated annual assessment revenue.

1 Interest earnings for April were approximately \$17,000.00. Mr. Dorrill reported the
2 District had also received approximately \$47,000.00 from the Collier County School
3 Board for drainage-related benefits. Total year-to-date revenue was approximately
4 \$3,928,000.00, or approximately 95% of the amount anticipated at that point in the year.
5 He stated the year-end interest forecast would likely be closer to \$195,000.00 rather
6 than the original \$209,000.00 budget because interest rates have somewhat declined.

7 On the expense side, Mr. Dorrill reported legal and engineering fees were over budget
8 due to litigation and technical permit-transfer research. He again explained that
9 insurance premiums and certain commodities are paid annually or seasonally in
10 advance, which can make the year-to-date budget column appear unfavorable before
11 the full fiscal year has elapsed. He used general insurance as an example, noting the
12 annual premium had been paid early in the fiscal year.

13 Mr. Dorrill reported total year-to-date operating expenses were approximately
14 \$114,000.00 over the unadjusted budget comparison, but stated that after accounting
15 for prepaid and seasonal expenses the District remained in a sound position. Total
16 expenditures, including capital, were approximately \$400,000.00 under budget at that
17 point, although substantial lake bank restoration expenditures and the annual capital
18 transfer were expected during the remainder of the year.

19 Mr. Dorrill reminded the Board that the July meeting will include the public hearing to
20 adopt the Fiscal Year 2027 budget and stated at least three Supervisors must be
21 physically present. He confirmed the meeting would begin at 1:30 p.m. and stated no
22 assessment increase is proposed.

23 **The financials were accepted as presented on a MOTION by Mr. Lee, a second by**
24 **Dr. Bularzik, and all in favor.**

25 **SUPERVISORS' REQUESTS**

26 **A. Letters of Appreciation**

27 Dr. Bularzik reported that Mr. Dorrill had prepared the letter of appreciation for Mr. Terry
28 Cole recognizing his years of service, and she signed it during the meeting. She also
29 reported that the letter of appreciation for Ms. Briant had been prepared on District
30 letterhead and signed.

31 Dr. Bularzik asked whether the District should prepare a letter of appreciation for Mr.
32 Phillips recognizing his years of audit service. Mr. Dorrill stated he did not believe a

1 separate letter was necessary at this time because Mr. Phillips was not retiring from the
2 profession or otherwise concluding all involvement. No action was taken.

3 **B. Park Benches**

4 Dr. Bularzik requested an update on the two proposed park benches along Celeste
5 Drive. Mr. Carter stated staff is continuing to work through the permitting process with
6 Mr. Dowty. He explained that the bench vendor does not prepare the type of site exhibit
7 required for the right-of-way permit, so staff and the engineer are developing the
8 necessary exhibit.

9 **C. Election**

10 Dr. Bularzik reported the two Supervisor positions had been posted for election. She
11 stated one seat was unopposed while Mr. Lee had an opponent. She asked Mr. Pires
12 whether current Board members could campaign, send emails, or otherwise support a
13 candidate without creating election law or Sunshine Law concerns.

14 Mr. Pires stated he had received a similar question from another district that day and
15 would research the election law and Sunshine Law implications before advising the
16 Board. The Board discussed the general election calendar and early voting dates. Dr.
17 Bularzik stated she would wait for counsel's guidance before sending any campaign-
18 related communication.

19 **D. Lely Island Estates Signage**

20 Dr. Bularzik requested an update on posts and signs in Lely Island Estates that had
21 been sandblasted and painted. Mr. Carter stated the District is working through
22 decorative posts and signs that are within the right-of-way or were assumed under prior
23 agreements. He explained that the work is in progress, with sandblasting followed by
24 repainting.

25 **E. LCDD Maintenance Building Refrigerator**

26 The Board discussed purchasing an additional large two-door refrigerator for the LCDD
27 building. Staff stated the building had previously been prepared with appropriate space
28 and electrical service. The Board discussed current pricing and delivery costs.

29 **On a MOTION by Mr. Fox, with a second by Dr. Bularzik, with all in favor, the**
30 **purchase of a two-door refrigerator for the LCDD building in an amount not to**
31 **exceed \$4,000.00 was approved.**

1 **F. Hurricane Season Bottled Water**

2 Dr. Bularzik requested that additional bottled water be purchased and stored for
3 hurricane season. The Board discussed purchasing approximately two pallets of bottled
4 water at a total cost not expected to exceed \$1,000.00. Mr. Dorrell stated the purchase
5 could be handled within his administrative authority and no separate motion was
6 necessary.

7 **G. Closed Door Session Materials**

8 Dr. Bularzik asked whether materials for the July 15, 2026 closed door session would
9 be provided to the Board in advance. Mr. Pires stated materials were anticipated and
10 could be printed and delivered in advance in the same manner as the prior session.

11 **H. Front Entrance Sign**

12 Mr. Lee requested an update on the damaged front entrance sign and stated that
13 leaving visible damage unrepaired does not reflect well on the community. The Board
14 discussed whether the sign is owned by the Master Association, whether repairs would
15 be pursued through the responsible driver's insurance, and whether the damaged
16 element may ultimately be removed or replaced as part of a broader entrance
17 reimagining project.

18 Staff stated the visible damage was relatively minor and could potentially be screened
19 temporarily with landscaping. The Board discussed the circumstances of the vehicle
20 accident and the need to balance prompt repair with the possibility that the entrance
21 sign configuration may change. Staff agreed to confirm the Master Association's repair
22 plans and ownership responsibility before unnecessary work is undertaken.

23 **PUBLIC COMMENT**

24 No public comments were received at this time.

25 **ADJOURNMENT**

26 The next meeting will be July 15, 2026, at 1:30 p.m. The budget public hearing will also
27 occur at the meeting. The closed-door attorney-client session is scheduled to begin at
28 3:00 p.m. **On a MOTION by Mr. Drum, and a second by Mr. Lee the meeting was**
29 **adjourned at 3:18 p.m.**
